Attached is the final version for the Weekly Summary for Venice. The FINAL document does not show redline/strike out. I am working up similar summaries for Chalmette and Grand Isle. (No data available for Cocodrie).

Please attach the sampling map between the narrative and the disclaimers. Venice will have a summary narrative with a large map on the back and the disclaimers below that.

Also, the latest Samples of Note did not break the samples out by location. EU will have to get the samples of Note broken out by location from now on. Thanks in advance.

Nick
